Membuat Repository Github

Membuat repo pada github

The screenshot shows the GitHub 'Create a new repository' page. The page has a dark theme. At the top, there's a header with the GitHub logo and the text 'Create a new repository'. Below this, there's a sub-header 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? Import a repository.' The main form has several sections: 'Required fields are marked with an asterisk (*)', 'Owner' (FadhlanFSJ), 'Repository name' (belajar-git), 'Description (optional)' (empty), 'Public/Private' (Public selected), 'Initialize this repository with:' (Add a README file), 'Add .gitignore' (gitignore template: None), 'Choose a license' (License: None), and a 'Create repository' button at the bottom right.

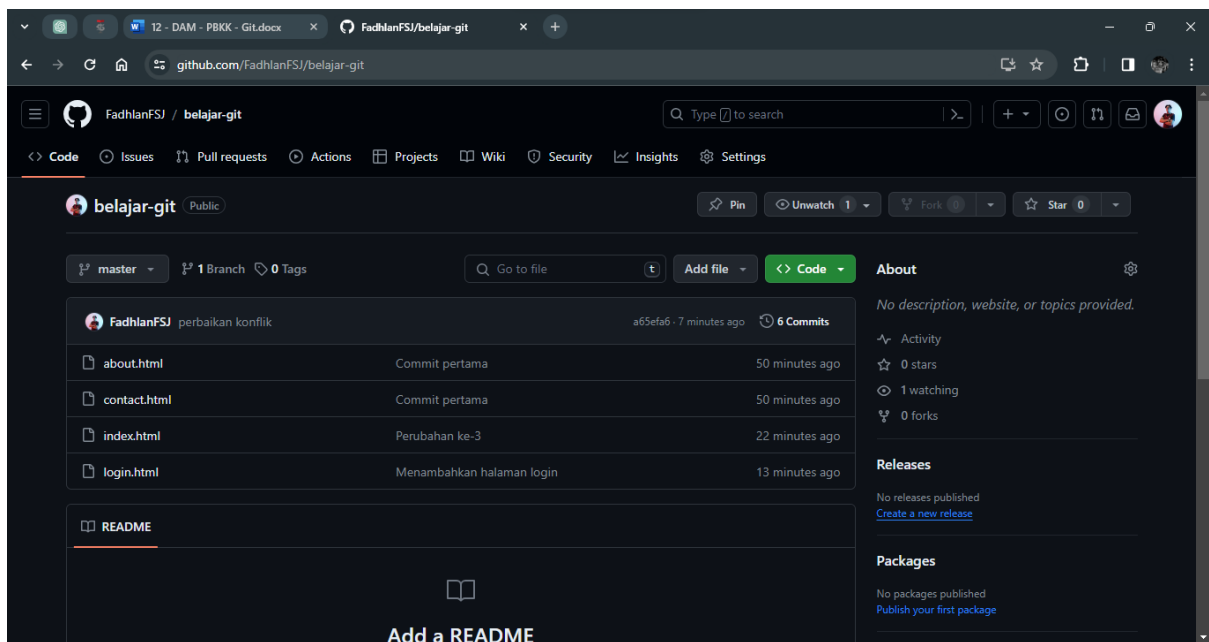

Menambahkan remote & mengecek remote sudah sesuai dengan url repo github

Melakukan push pada repo github

```
